PROFILE

Dynamic and detail-oriented graduate with a recent foundation in C++, Java , HTML, CSS, and JavaScript, specializing in ReactJs. Eager to contribute to innovative projects and leverage my proficiency in programming languages, along with my problem-solving skills, to develop robust and efficient software solutions Seeking an entry-level position where I can continuously learn, collaborate with a talented team, and make meaningful contributions while furthering my expertise in software development

WORK EXPERIENCE

Internship, Proglint Software Solutions

June 2024 - Present

- Developing knowledge on fundamentals of Javascript and its frameworks
- Hands-on experience in Javascript

PROJECTS

Amazon Clone (HTML,CSS,Javascript,React Js , Firebase)

- This project resembles the actual Amazon e-commerce website
- It uses Firebase for Authentication, Database, Functions and Hosting.

Block-Auth: Blockchain-based authentication for digital documents using KNN algorithm

- Enhancing BLOCK-AUTH with the K Nearest Neighbors (KNN) algorithm for improved accuracy and efficiency in authentication.
- Leveraging blockchain's decentralized and immutable nature .

Personal Portfolio (HTML,CSS,Javascript)

- This is a personal portfolio that showcases my skills and the projects done with interactive UI.
- This project is deployed using Netlify.

COURSES AND ACHIEVEMENTS

- Course on Web development in Udemy.
- Course on Java and C++
- Front-end Development course in Coursera.
- Course on React js which covers React Router and Redux
- Participated in TECHNOVATION Hackathon
